On Demand

Instant Asset Visibility No Matter Where Deployed

Visual Asset Manager Provides:

- Asset management support, "right out-of-the-box" for fiduciary partners
- Spreadsheet reporting options to manage the finances of fixed asset tracking
- GPS enabled vehicle-fleet tracking to support Emergency Management Agencies (EMA)

Solves Asset-Tracking Problems by:

- Removing inconsistencies between purchases & expenditures
- Providing dynamic reporting tools to meet federal audit requirements

Testimonial

We've got everything at our finger tips — everything we need to know about every purchase we've ever made is available at the click of a mouse.

— Bill York, *SE PA Regional Taskforce*

Streamlines the Asset Management Process by:

- Reconciling clusters of similar assets for easier tracking
- Generating annual reports organized by grant year, type & purchase order
- Tracking fixed assets moved from grant to grant
- Tracking EMA & incident response equipment that are out on loan
- Monitoring allocation of grant money spent on equipment

System Requirements

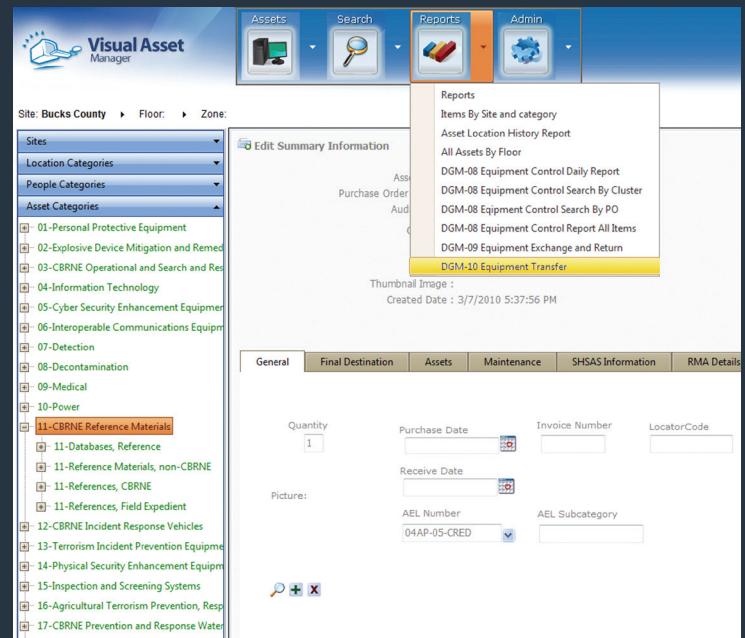

- Core2Duo 2.5ghz
- 2 GB RAM & 4 GB Disk Space
- Network Connection
- SQL 2005/08 Advanced Services Express
- Internet Information Services
- .NET Framework 4.0

Save Time, Money, & Lives

Visual Asset Manager allows user to focus on emergency management, not implementing new software. Reconcile assets and grants to maximize expenditures, increase productivity, and reduce audit time.

UASI / Complete Reporting

- Emergency Management Framework meets organizational requirements for UASI funding
- Report generator feature demonstrates where & how grant money is spent
- Eliminate inefficient spreadsheets by focusing information on a centralized database system
- Centralized database systems encourage rapid access & deployment of vital first responder assets
- Increases efficiency & end-user accountability
- Less time spent searching for fixed assets means more time preparing for & responding to major disasters & events
- Grants access to vital assets by eliminating miscommunication

Testimonial

I needed software that could streamline our asset management process, [with] a powerful search tool which would allow me to track a range of asset information like maintenance, cost and vendor details. Visual Asset Manager is that software.
